

QUICK TIPS FOR A HASSLE FREE PLUNGE POOL APPROVAL

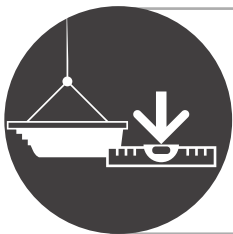

1. Provide a site plan (with dimensions to boundaries)

2. Detail the pool fence (check the boundary fences comply, if they are to be used)

3. Cross check location of services within 3m of the proposed pool location. Detail any services within 3m.

4. Engage your engineer early, if required. Pre engineered options may be applicable. Form 15s/ 16s and retaining wall details (if applicable) can be forwarded to the certifier.

Its easy to get started for your pre cast pool approval – send through plans to info@buildingaaa.com.au for a fee proposal.
